## GAY FEEDS? BUT I OWN A STRAIGHT SITE!

As a webmaster – you will have noticed over the past months that the adult industry has experienced a revenue flat-line. Global market economies have limited disposable income and as webmasters – you need to find new and creative ways to reach your market with innovative and creative content they want. Straight sites are currently looking for ways to enhance the user experience to sell, retain and upsell to their traffic. Many straight sites are experiencing success by broadening their market reach to attract gay and gay-friendly consumers. These consumers are interested in ‘experimenting’ but are not comfortable, in many cases, going directly to gay sources to meet this need. Your solution – simple – combine *Maleflixxx VOD Channels* with your current straight offering and meet the needs of all these markets.
